Beginning Sept. 20, 2023, the University will be launching a new occupational health management portal.

If you experience a work-related injury that does not require emergency medical treatment, the portal provides a Workplace Injury Intake Form to report the injury to Occupational Health. In an emergency, dial 911.

If you are traveling for University work or research and require immunizations or health consultation, click on Travel Form to complete a questionnaire.

For resources from the Office of Human Resources for information on short term disability, requesting accommodations and Family Medical Leave (FMLA), click HR Resources.

The portal allows you to upload documentation to your portal such as vaccination records, medical records, etc.
