EHS Lab Coat Program

- Centrally Administered
- On-Demand Automated Distribution
- Automated Collection
- Laundered and Inspected
- Always Available

To check out a lab coat:

You must be added as a lab member in SHIELD. EHS will assign the lab coat you need based on the hazards present in your lab.

1. Go to the location on campus closest to your work area to check out a coat using your TigerCard.

Note: users can use any of the machines to obtain/return a lab coat; however, your size/type of coat may not be available at all sites.

2. Select the “lab coat” button to choose your size and click the green arrow at the bottom right corner of the screen to dispense lab coat.

3. To return your coat, simply tap your TigerCard and place your lab coat into the hatch **after making sure pockets are empty**. Close the door and wait until the light turns off.

At this point you will be able to get another coat from any dispenser machine.
